PROJECTS

HILL VIEW ESCAPE – HOTEL WEBSITE WITH BOOKING FEATURE **Github Live**
Developed and deployed a full-stack hotel booking website featuring real-time room reservation functionality. Implemented automated email notifications to send instant booking confirmations to users. Utilized React for the frontend and Node.js with MongoDB for backend APIs, and deployed the application on Vercel, Render, and Railway for seamless scalability and performance.

MY PERSONAL PORTFOLIO WEBSITE **Github Live**
Designed and deployed a personal portfolio website using React, with styling implemented through HTML and CSS, and enhanced by an interactive Three.js animated background. Showcases technical skills, contact details, and provides downloadable and printable CV access in PDF format. Developed a fully functional contact form using Node.js and Express, with MongoDB for data storage. Ensured full responsiveness across devices, delivering a smooth and engaging user experience.

FOOD RECIPE APP USING REACT NATIVE **Github Live**
Developed a frontend-only food recipe mobile application using React Native, consisting of seven screens with a clean and intuitive UI and smooth navigation for browsing and viewing recipes. The application was built without backend integration, focusing on frontend design and user experience.
